

Ophea's Healthy Schools Certification

2018/2019 Registered Schools

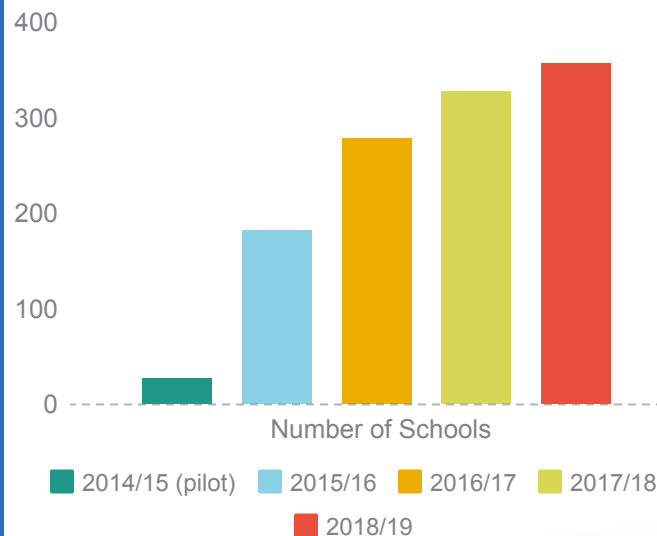

Ophea's Healthy Schools Certification celebrates and recognizes school communities for promoting and enhancing the health and well-being of students, school staff, and the broader community.

Participating schools complete a 6-Step process through which they establish a school team, identify their school community's needs and assets, choose a priority health topic, develop an action plan, implement and monitor their action plan, and celebrate and reflect on their successes.
